An NSF Research Experience for Undergraduates (REU) Program in Chemical Sensing and Imaging at UMBC

The program seeks to attract a diverse group of students including female students and students from traditionally underrepresented groups in line with our mission at UMBC to offer a welcoming environment to all students and train the next generation of diverse professional workforce in STEM fields. Applicants for this 10-week research experience should be undergraduate students in U.S. academic institutions who are U.S. citizens or permanent residents, pursuing B.Sc. degrees in chemistry and biochemistry or related fields, maintaining a GPA of 3.0 or greater, and are considering applying to graduate school in the chemistry and biochemistry or related fields upon completion of their undergraduate degree.

Application Deadline – March 3rd, 2017

To learn more and to apply visit

<http://reu.umbc.edu>

Program benefits include:

- Research experience in leading UMBC laboratories in the area of chemical sensing and imaging.
- A \$5,000 stipend, on-campus housing, and social activities
- Professional training workshops.

UMBC takes advantage of its prime location on the Baltimore-Washington corridor to forge links with government, business, and industry. High-tech corporations and laboratories are key partners with the UMBC community
